9th EDITION

WK
2017

A.T.S.
ANATOMICALLY
TERRY STRUCTURE

22 Struttura della spugna differenziata e anatomica per piede destro e sinistro. Massima protezione e comfort.

Differentiated anatomically terry structure for right and left. Maximum protection and comfort.

DIFFERENTIATED
D.T.S.

23 Struttura della spugna differenziata e anatomica. Massima protezione e comfort. *Differentiated anatomically terry structure. Maximum protection and comfort.*

Anatomical
**SHOCK ABSORBER
PAD**

24 Cuscinetti anatomici in spugna differenziati per piede DX e SX, svolgono una funzione ammortizzante/riposante per il tallone ed il palmo del piede.

Anatomical terry pads for different right and left foot, play an Cushioning / calm to the heel and palm of the foot.

**TALO-NAVI
PROTECTION**

25 Cuscinetto anatomico protettivo/ammortizzante dallo sfregamento e concussioni dell'arco plantare, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the foot arch, different for L and R foot.

**META
TARSUS
PAD**

26 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona metatarsale, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the metatarsus zones, different for L and R foot.

**FIBULA
PAD**

27 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona tibiale, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the fibula zone, different for L and R foot.

**SHINBONE
PAD**

28 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona peronale alta, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the shinbone zone, different for L and R foot.

anatomical
CALF-PAD

29 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona tibiale posteriore, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the calf zone, different for L and R foot.

anatomical
FLEXOR-PAD

30 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona flessore-posteriore, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the flexor zone, different for L and R foot.

**GRIP-TECH
PLANT PAD**

31 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona plantare, differenziato per piede Sx e Dx, la sua struttura aumenta il grip con la superficie di appoggio.

Anatomical terry pad protective/damping by the friction and concussion of the plant, different for L and R foot, it improve the grip.

**OUTER
PHALANGES
PAD**

32 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona falangica esterna, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the external phalanges, different for L and R foot.

**INNER
THUMB PAD**

33 Cuscinetto protettivo/ammortizzante dallo sfregamento e concussioni della zona falangica interna, differenziato per piede Sx e Dx.

Anatomical terry pad protective/damping by the friction and concussion of the internal phalanges, different for L and R foot.

**DRY-TECH
FLOW**

34 Inserti anatomici tessuti in trama Dry-Ring con elevata capacità traspirante.

Anatomical inserts made in "Dry-Ring" texture with high breathability.

Anatomical
KNUCKLES protective
DRY-PAD

35 Cuscineti anatomici in spugna differenziati per piede DX e SX, svolgono una funzione ammortizzante/protettiva per le nocche delle dita del piede.

Anatomical terry pads for different right and left foot, play a Cushioning/protective to the knuckles of the foot.

36 Lavorazione tecnica della maglia in trama a forma di diamante che aumenta la superficie di aerazione, favorendo la traspirazione verso l'esterno dell'umidità e del calore generati dall'attività fisica con un efficace aumento del comfort durante l'utilizzo dell'indumento. Il posizionamento del DryFasTex è studiato per essere applicato nelle zone che rendono massima la sua funzionalità, e progettato in base al tipo di utilizzo per cui è concepito l'indumento. La funzionalità della DryFasTex amplifica il flusso di aerazione generato autonomamente dal movimento continuo degli arti durante l'attività fisica, rendendolo più efficace con la finalità di migliorare il valore assoluto delle prestazioni, in particolar modo per gli sport che richiedono intensi e prolungati sforzi fisici.

Processing technique of the mesh in the weft in a diamond shape that increases the ventilation surface, facilitating the outward transpiration of moisture and heat generated by the physical activity with an effective increase in comfort during use of the garment. The positioning of the DryFasTex is designed to be applied in zones that make up its functionality, and designed according to the type of use for which the garment is designed. The functionality of the aeration DryFasTex amplifies the flow generated independently from the continuous movement of the limbs during physical activity, making it more effective with the aim of improving the absolute value of performance, especially for sports that require intense and prolonged physical exertion.

DRYFASTEX

37 Compressione graduale attiva che favorisce ed incrementa gradualmente la velocità del flusso ematico, aumentando l'apporto di ossigeno alla muscolatura migliorandone le performance.

Active gradual compression that aid and increases gradually the speed of blood flow, extending the oxygen supply to the muscles and improving the total performance.

SMART SQUEEZE
energizing compression

38 Tecnica di tessitura della maglia con l'integrazione totale di una struttura elastica che crea un effetto esoscheletro sostenitivo per la massa muscolare, inoltre aumenta la proprietà traspirante delle zone realizzate in maglia liscia a spessore "zero".

Technique of weaving mesh with the total integration of an elastic structure that creates a supportive exoskeleton for muscle mass also increases the breathable properties of the zones created in plain thick "zero".

IntegraTECH
structure

39 Inserti a strisce parallele nella zona plantare realizzate in maglia Extra traspirante, aumentano la traspirazione ed il mantenimento costante del microclima ideale, evitando il ristagno del sudore e del calore in eccesso generato dall'attività fisica.

Inserts into strips parallel to the plantar area made of breathable mesh Extra, increase breathability and constant maintenance of the ideal microclimate, avoiding the stagnation of sweat and excess heat generated by physical activity.

CLIMA
STRIPES

40 Inserti anatomici realizzati in un nylon ad alta resistenza all'usura trattato con l'applicazione di nano particelle di PTFE che riducono fortemente l'attrito prevenendo la formazione di vesciche e irritazioni cutanee nei punti di maggior sfregamento.

Anatomic insert made of a Nylon with a high resistance to usage treated with the application on nano particles of PTFE which reduces friction preventing blistering and skin irritation in the points of greatest contact with the outer garments.

Concept Calze Tecniche

BASIC TECH

Calze realizzate con la combinazione di filati standard di buona qualità, con strutture tecniche e rinforzi essenziali. Cuciture piatte.

Socks made with a combination of good-quality standard yarns, technical facilities and essential reinforcements. Flat seams.

MEDIUM TECH

Calze realizzate con la combinazione di filati tecnici di buona qualità, con strutture tecniche e rinforzi standard. Cuciture piatte.

Socks made with a combination of good-quality technical yarns, technical facilities and standard reinforcements. Flat seams.

HIGH TECH

Calze realizzate con la combinazione di filati tecnologici di alta qualità, con strutture tecniche e rinforzi di livello ricercato. Cuciture piatte extra-fine.

Socks made with a combination of high-quality yarn technological, with technical structures and reinforcements wanted level. Extra-fine flat seams.

TOP TECH

Calze realizzate con la combinazione dei migliori filati tecnologici di alta qualità, con strutture tecniche ergonomiche e rinforzi anatomici di livello ricercato. Cuciture piatte extra-fine.

Socks made with a combination of the best high-quality technological yarns, with ergonomic technical structures and anatomical reinforcements refined. Extra-fine flat seams.

R-EVO TECH

Calze realizzate con la combinazione dei migliori filati tecnologici di alta qualità e innovativi, con strutture tecniche ergonomiche differenziate per piede destro e piede sinistro e rinforzi anatomici di livello sofisticato. Cuciture piatte extra-fine.

Socks made with a combination of the best high-quality technological and innovative yarns, with technical ergonomic facilities different for right foot and left foot and sophisticated level of anatomical reinforcements. Extra-fine flat seams.

Concept Calze Classiche

STANDARD QUALITY

Calze realizzate con la combinazione di filati, cuciture e rinforzi di buona qualità. Confezionate in imballi a standard industriale.

Socks made with the combination of yarn, stitching and reinforcements good quality. Packaged in industry standard packaging.

BEST QUALITY

Calze realizzate con la combinazione di filati, cuciture e rinforzi di buona qualità. Confezionate singolarmente con blister riportante le caratteristiche del prodotto.

Socks made from the combination of yarn, stitching and reinforcements good quality. Individually packaged in blister showing the product characteristics.

HIGH QUALITY

Calze realizzate con la combinazione di filati, cuciture, rinforzi e strutture tecniche di ottima qualità. Confezionate singolarmente con blister e cartellino riportante le caratteristiche tecniche dettagliate e le immagini del prodotto.

Socks made with the combination of yarn, sewing, and reinforcements technical facilities of excellent quality. Individually wrapped with blister card and setting out the detailed technical product images.

QUALITÀ ARTIGIANALE

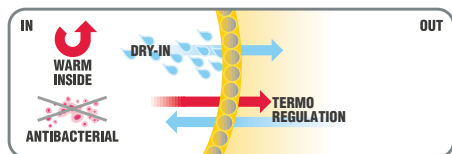

Calze realizzate con la combinazione dei migliori filati, strutture tecniche e rinforzi pregiati di alta qualità. Cuciture eseguite a mano per garantire il comfort assoluto. Confezionate singolarmente con blister/scatola personalizzato per ogni prodotto, riportante le caratteristiche tecniche dettagliate con le immagini.

Socks made with the combination of the best yarns, textures reinforcement techniques and fine quality. Stitching done by hand to ensure absolute comfort. Packaged individually blister/box for each custom product, setting out the technical details with images.

MERINO¹⁵⁰ feel good

INTIMO TECNICO TRASPIRANTE TERMOREGOLANTE
REALIZZATO IN MISCHIA LANA MERINO
POLIPROPILENE DRYARN E NYLON.

UNDERWEAR THAT BREATHES AND IS THERMOREGULATING,
MADE FROM A MIX OF MERINO WOOL, POLYPROPYLENE
DRYARN, AND NYLON.

MERINO FEEL GOOD: L'innovativa struttura di questo tessuto permette di avere contemporaneamente a diretto contatto con la pelle due diverse fibre lavorate in trama "traspirant channels".

Il polipropilene Dryarn veicola ed accelera il processo di traspirazione del sudore corporeo verso l'esterno, mentre la pura lana merinos offre il massimo comfort e una capacità di termoregolazione perfetta in qualsiasi condizione climatica ambientale, dal freddo estremo al caldo eccessivo.

La lana merinos è rinforzata con il nylon per garantire la possibilità di manutenzione e lavaggio dei capi secondo i parametri "Total Easy Care".

Tutte le fibre utilizzate godono di eccellenti proprietà antibatteriche, idrorepellenti, antimacchia, antimuffa, antiodoranti e anallergiche che permettono un elevato livello di igiene anche dopo innumerevoli ore di utilizzo senza lavaggio.

Cuciture piatte e modello ad alta vestibilità. I tessuti utilizzati rispettano i parametri eco tossicologici OEKO TEX STANDARD 100.

This fabric's innovative structure allows for simultaneous and direct contact with the skin of two different fibers produced with a "breathable channels" weave.

The polypropylene Dryarn carries and accelerates the wicking of body sweat to the outside, while pure merino wool offers maximum comfort and a perfect temperature control capability in any climactic environmental condition, from extreme cold to extreme heat.

The merino wool is reinforced with nylon to guarantee ease of maintenance and washing of the articles according to "Total Easy Care" standards.

All the employed fibers have excellent antibacterial properties, are water-repellent, stain-resistant, mold-resistant, odor-resistant, as well as hypoallergenic, allowing for a high level of hygiene even after many hours of use without washing.

With flat seams and accommodating a wide range of sizes The fabrics used meet the eco-toxicological standards of OEKO-TEX STANDARD 100.

Caratteristiche/Technical characteristics:

Elevato isolamento termico / High thermal insulation.

Massima leggerezza e morbidezza / Top lightness and softness.

No pilling, non si stira / No pilling, no ironing.

Antiallergico / Anti-allergic.

Taglie / Sizes: S - M - L - XL - XXL

Colori disponibili/Colours available: Nero / Black

Cuciture piatte a 4 aghi / 4-needle flat seams

Tessuto elasticizzato per una vestibilità perfetta / Elasticized fabric

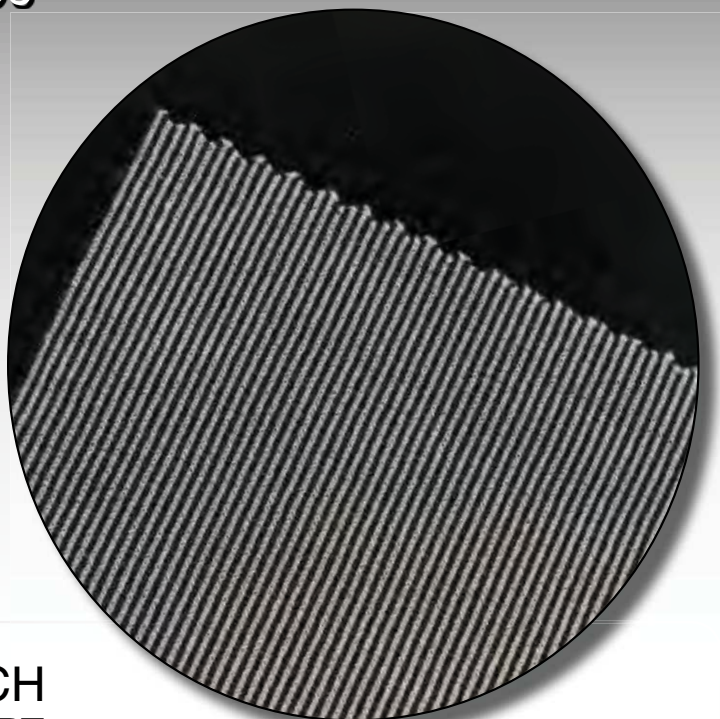

Consigliato per / Recommended use:

Sci, snowboard, sci di fondo, escursionismo, trekking, alpinismo, caccia, pesca, tempo libero e attività invernali.

Ski, snowboard, cross country, hiking, trekking, mountaineering, cycling, hunting, fishing, free time and winter sports.

Dry-Skin

GRADUATED COMPRESSION

ASCIUTTO E CLIMATIZZATO!

THE FEEL GOOD MICROFIBRE
Dryarn

Worik Dry-Skin intimo seamless è prodotto con polipropilene (all'interno ed all'esterno) ed elastan per una migliore durata nel tempo di prestazioni e comfort.

Questa combinazione di fibre e di un'avanzata tecnologia seamless garantisce il massimo del comfort e una compressione graduata costante per migliorare le vostre prestazioni e mantenere asciutto e climatizzato il corpo sia in estate che in inverno.

Il polipropilene che abbiamo scelto ha proprietà idrorepellenti, evitando la proliferazione di batteri, muffe, microrganismi e la formazione di odori sgradevoli. Queste fibre non provocano alcuna reazione allergica e non causano pruriti. I capi mantengono la morbidezza e la loro forma originale anche dopo molti lavaggi, sono di rapida asciugatura e non hanno bisogno di essere stirati dopo il lavaggio.

The Worik Dry-Skin performances seamless underwear is produced with polypropylene inside and outside for better durability with Elasthan.

This combinations of fibres and an advanced seamless knitting technology will provide a maximum of comfort and graduated compression will keep to improve your performances and keep dry your body.

The polypropylene that we selected has hydrophobic properties, preventing the proliferation of bacteria, mould and microorganism, avoid the formation of unpleasant odors. These fibres do not provoke any allergic reaction and do not cause itching. The garments maintains their softness and their original shape even after many washing circles, it drying fast, keep the colour and there no need to iron.

INTIMO SEAMLESS TECNOLOGICAMENTE EVOLUTO CON ELEVATE PROPRIETÀ TECNICHE, DI DURATA E QUALITÀ COSTRUTTIVA, CONCEPITO PER UN UTILIZZO MULTIFUNZIONALE PER SPORTIVI E PROFESSIONISTI ESIGENTI CHE DESIDERANO AVERE UN CAPO CHE SIA IN GRADO DI MANTENERE SEMPRE IL CORPO NELLA CONDIZIONE OTTIMALE (ASCIUTTO, CLIMATIZZATO E TONICO) NELLE PIÙ SVARIATE SITUAZIONI DI UTILIZZO E INTENSITÀ DI SFORZO FISICO AL FINE DI DIMINUIRE LO STRESS ED AUMENTARE IL LIVELLO ASSOLUTO DELLE PRESTAZIONI.

ADVANCED TECHNOLOGICAL SEAMLESS UNDERWEAR WITH HIGH PROPERTIES OF DURATION AND MANUFACTURE QUALITY. THIS ITEM IS DESIGNED FOR MULTIPURPOSE USE, FROM SPORTS TO PROFESSIONALS WHO NEED AN ARTICLE TO KEEP BODY IN OPTIMAL CONDITION (DRY, TRANSPIRED AND TONED) DURING SEVERAL SITUATIONS OF PHYSICAL EFFORT INTENSITY. THE RESULT IS TO REDUCE STRESS AND INCREASE THE ABSOLUTE LEVEL OF PERFORMANCE.

Una forza della natura

La fibra resiste ai lavaggi domestici frequenti anche alle alte temperature, persino in presenza simultanea di tessuti colorati, scuri e chiari. Si mantiene intatta anche all'abrasione, alle rotture, a lunghe esposizioni a luce e calore senza subire alterazioni, allo sfregamento (no antiestetici fenomeni di pilling), all'immersione in acqua di mare e addirittura al contatto con solventi concentrati. Il colore, la dimensione e l'aspetto non cambiano. Una resa estetica perfetta essendo un filato dimensionalmente stabile (variando di meno del 2%). In parole povere, una maglietta in Dryarm® mantiene la stessa taglia e la stessa vestibilità nel tempo, potete metterci la mano sul fuoco, la fibra è anche... autoestingente.

A force of nature

The fiber is resistant to common household washing at high temperatures, even in the simultaneous presence of colored fabrics, dark and light. Remains intact even to breakage, long exposure to light and heat without alteration, to rubbing (no unsightly pilling phenomena), immersion in seawater and even in contact with solvents concentrated. The color, size and appearance do not change. An aesthetic ideal as a yarn dimensionally stable (varying by less than 2%). In other

Microfibra, maxi-igiene

Dryarm® è esente dalla formazione dei cattivi odori causati dalla proliferazione della flora batterica (tarme, insetti muffe o altri microorganismi) che si insedia nelle aree umide degli indumenti. La condizione stabile e ideale di "asciutto" del tessuto ne inibisce preventivamente la formazione, allontanando il rischio di irritazioni, allergie e dermatiti. Il segreto è nella assoluta idrofobicità e nella elevata tensione superficiale che veicola umidità e sudore verso l'esterno, dove evaporano mantenendo la pelle sempre asciutta e un ambiente indenne dal proliferare dei batteri causa di odori sgradevoli. Anche dopo attività fisica intensa e prolungata. Una fibra "naturalmente" batteriostatica e non Antibatterica. Rispetta quindi i batteri amici della flora cutanea come lo Staphylococcus epidermidis, che produce e mantiene l'ambiente acido dello strato superficiale della pelle (pH). In modo naturale, non come un antibatterico o un battericida ma come un efficace, invisibile alleato della nostra salute. L'ipoallergenicità "attiva" e permanente di Dryarm® la rende una fibra ideale anche per l'uso in campo medico.

Microfiber, maxi-higiene

Dryarm® is exempt from the formation of odors caused by bacterial overgrowth (moths, insects, molds or other microorganisms) who settled in the wetlands of the clothing. The stable condition and ideal for "dry" fabric inhibits the formation beforehand, removing the risk of irritation, allergies and dermatitis. The secret is in the absolute hydrophobicity and high surface tension that carries moisture and perspiration, which evaporates keeping the skin dry and an environment free from the proliferation of bacteria due to unpleasant odors. Even after intense and prolonged physical activity. A fiber "naturally" bacteriostatic and antibacterial. Therefore respects the friendly bacteria of skin flora such as Staphylococcus epidermidis, which produces and maintains the acidic environment of the surface layer of the skin (pH). Naturally, not as an antibacterial or bactericidal but as an effective, invisible to our health. The hypoallergenic "active" and standing Dryarm® makes it an ideal fiber for use in the medical field.

DOUBLE LAYER MESH 130 DLM

INTIMO TECNICO TRASPIRANTE ANTIFREDDO
IN DOPPIO STRATO TRAFORATO/
TECNICAL AND TRANSPIRANT UNDERWEAR
WITH DOUBLE LAYER MESH

DOUBLE LAYER MESH: Realizzato con tessuto 100% polipropilene da 130 gr/mq. Questo tessuto tecnico è termoregolante ed antifreddo, ideale per chi opera in ambienti a bassa temperatura ed esterni in stagione invernale. Realizzato in lavorazione con doppio strato di maglia traforata, garantisce una elevata traspirabilità e rimozione dell'umidità corporea, mantenendo la pelle sempre asciutta. Di rapida asciugatura, è idrorepellente e antimacchia ed inattaccabile da muffe e batteri con proprietà anallergiche e antiodoranti. Particolarità: Cuciture piatte e modello ad alta vestibilità. I tessuti utilizzati rispettano i parametri ecotossicologici OEKO TEX STANDARD 100.

Made from 100% polypropylene fabric 130 gr/sqm. This technical fabric is thermoregulatory and anticold, ideal for those who work in environments low temperature in winter and outdoor. Done with double layer of openwork knitting, guarantees a high removal body moisture keeping the skin dry. Of Quick drying, water repellent and stain resistant and resistant to mold and bacteria with anti-allergic properties and antiodoranti. Specialties: Flat seams and model high fit.. Tissues meet the eligibility criteria of eco-Toxicological Oeko Tex Standard 100.

Caratteristiche/ Technical characteristics:

Elevato isolamento termico / High thermal insulation.

Massima leggerezza e morbidezza / Top lightness and softness.

No pilling, non si stira / No pilling, no ironing.

Antiallergico / Anti-allergic.

Taglie / Sizes: XS - S - M - L - XL - XXL - 3XL - 4XL

Colori disponibili/ Colours available: Nero/Black

Cuciture piatte a 4 aghi / 4-needle flat seams

Tessuto elasticizzato per una vestibilità perfetta / Elasticized fabric

Consigliato per/ Recommended use:

Sci, snowboard, sci di fondo, escursionismo, running, trekking, alpinismo, ciclismo, caccia, pesca, tempo libero, motociclismo e attività invernali a basse temperature.

Ski, snowboard, cross country, hiking, running, trekking, mountaineering, cycling, hunting, fishing, free time, motorcycling and winter sports or in cold environments.

Le proprietà del polipropilene/ Properties of polypropylene

È un tessuto estremamente leggero, grazie alle sue fibre cave crea uno strato isolante e termico tra la pelle e l'esterno che mantiene costante e ottimale il microclima del nostro corpo. Questa è una condizione essenziale per mantenere alto il nostro livello di comfort e conseguentemente la concentrazione mentale e la condizione fisico-operativa. Non assorbe l'umidità e la espelle rapidamente, mantenendo la nostra pelle asciutta azzerrando il rischio di perdere calore corporeo. Scegliendo la giusta grammatura dei capi in polipropilene in base alle condizioni atmosferiche e le temperature di utilizzo garantiamo al nostro corpo il mantenimento della pelle asciutta, del giusto calore e livello di umidità. I tessuti utilizzati per questa gamma di intimo rispettano i parametri OEKO-TEX standard 100.

The hollow fibres of this extremely light fabric form an insulating and thermal layer between the skin and the outside, and maintains our body's micro-climate under steady and ideal conditions. This must-have provides provide maximum comfort, allows you to stay focused and physically reactive. It does not absorb humidity and rapidly expels perspiration keeping our skin dry, thus zeroing the risk to lose body heat. If the weight of polypropylene garments is decided according to weather conditions and operating temperature, our skin will definitely be dry, and our body will enjoy ideal heat and perspiration. The textiles used to produce this underwear collection comply with the OEKO-TEX 100 standards.
